exchange student interaction design

■ ■ BOXPOD

■ concept

turn the AR-marker into a drum loops machine

using a midi input device as controller

augmented reality as visualisation for sound creation

BOXPOD

usage

```
midi input device pod    = selector  
midi input device z-axis = enter
```

```
repeating selection modes:  
row > box > value
```

■ ■ BOXPOD

■ remarks

simplicity

exploration

creation
